1. General Norstad concurs with my operation control proposal in reference message as amplified in paragraphs 4 and 5.

2. I believe the referenced message is complete enough to guide you. I have nothing further to add at this time except to point out that any proposals or actions which are manifestly more extensive or unique than ones done heretofore should be cleared through me instead of direct to CINCEUR. Also, I consider the activities on the Autobahn not falling within the proposals in the referenced message.

3. Any activities which are liable to lead to increased support from outside Berlin will be taken up direct with me. In case of doubt, err on the side of taking up matters direct with me.

4. General Norstad says "in this respect, it is absolutely necessary that Palmer and I be kept well informed on Berlin developments and communications arrangements in Berlin must be devised to this end". You are authorized to continue to use my Liaison Officer as in the past few days for this purpose. The results so far as I am concerned have been very satisfactory and I have been so informed by General Palmer.
